Booth-Level Performance of BJP

Data Analysis Report

– Warangal West

By

PULI ABHISHEK

ABSTRACT

This report presents a comprehensive booth-level analysis of the Bharatiya Janata Party's (BJP) electoral performance in the Warangal West Assembly Constituency. Using detailed polling station data, the study examines vote distribution identifies strong and weak geographic clusters and quantifies performance gaps relative to competing parties. The analysis highlights significant growth trends for BJP compared to previous election cycles while also pinpointing critical low performing booths that require strategic intervention. The findings serve as a data-driven foundation for targeted campaign planning resource allocation and grassroots outreach efforts aimed at improving BJP's electoral prospects in the next election.

INDRODUCTION

The electoral landscape of Warangal West has undergone significant transformation in recent years, with shifting voter preferences and evolving political dynamics influencing outcomes at the booth level. A detailed understanding of these micro-level voting patterns is essential for formulating effective political strategies, especially for a party experiencing rapid growth such as theBharatiyaJanataParty(BJP).

This report presents a comprehensive booth-wise analysis of BJP's performance in the constituency, highlighting strongholds, weak-performing areas and potential opportunity zones. By evaluating vote share distributions comparative performance with major parties, and historical voting trends the report aims to equip BJP leadership with actionable insights to optimize their outreach and maximize electoral gains in the upcoming elections.

Background:

The Warangal West Assembly Constituency represents a politically diverse and highly competitive urban segment of Telangana. Over the past two election cycles, the constituency has witnessed dynamic shifts among the major political parties **Bharat Rashtra Samithi (BRS), Indian National Congress (INC)**, **Bharatiya Janata Party (BJP)**, and Bahujan Samaj Party (BSP) along with several independent candidates. While BRS and INC have traditionally dominated the region, recent electoral results indicate a growing presence and increasing voter acceptance for the BJP.

Each party's performance varies significantly across polling stations due to local demographics residential patterns caste composition community-based influence,and development expectations. INC shows strong pockets in several residential clusters BRS maintains influence in historically aligned areas, and BSP along with independent candidates show concentrated but small vote bases.
However the emerging story is BJP's substantial growth from the previous election with notable increases in vote share and performance across multiple booths signaling a shift in political sentiment and new opportunities for expansion.

To capitalize on this momentum a deep booth-level analysis is essential. Understanding where BJP is performing strongly, where it is underperforming, and where swing opportunities exist provides crucial insight for strategic planning. This report examines the vote distribution of **all major parties**, but places special emphasis on the **BJP's booth-wise performance** identifying key strengths, weaknesses, and actionable opportunities to further improve the party's prospects in the next election.

Objectives

The primary objective of this report is to conduct a comprehensive booth-level analysis of the Bharatiya Janata Party's (BJP) electoral performance in the Warangal West Assembly Constituency, with the broader aim of supporting strategic planning for future elections. The specific objectives include:

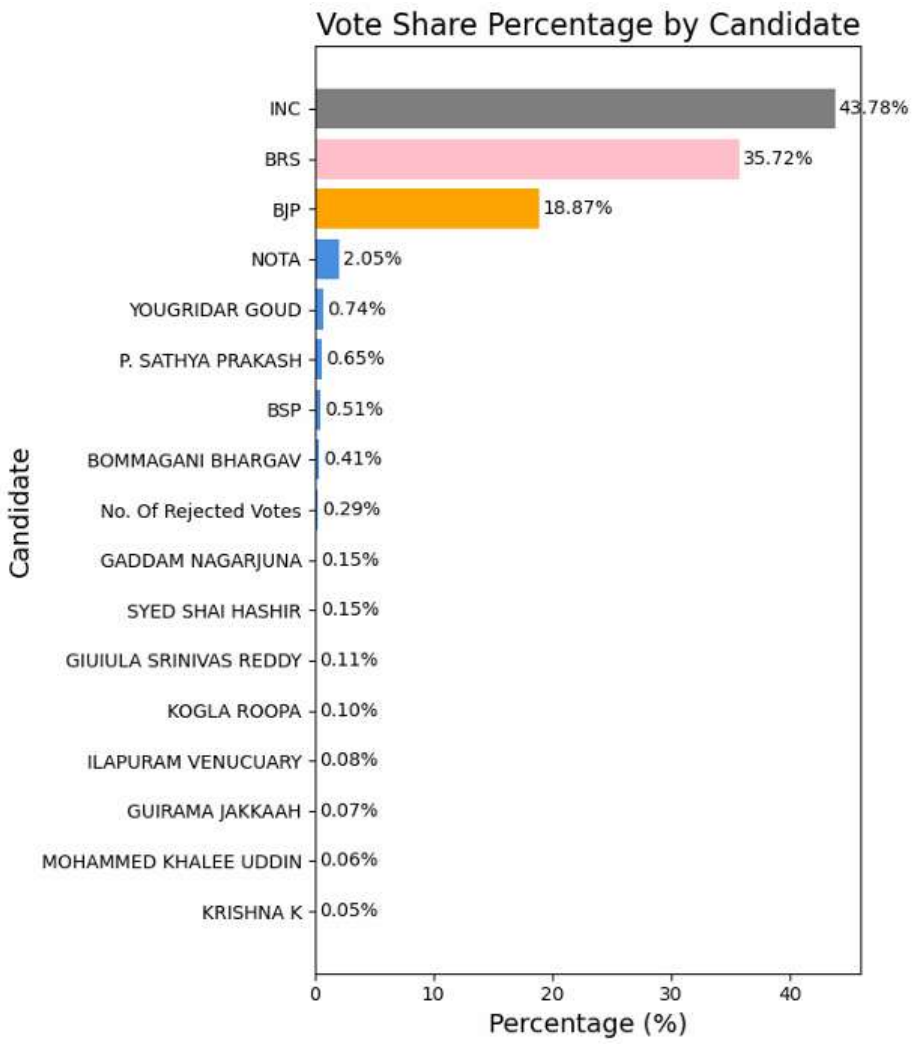
1. **To analyze booth wise voting patterns** of all major political parties, including BJP, INC, BRS, BSP and independent candidates.
2. **To identify high performing and low-performing booths** for BJP to understand areas of strength and weakness.
3. **To compare BJP's performance against other major parties** at the micro (polling station) level.
4. **To determine vote share distribution** and evaluate trends that influence overall constituency outcomes.
5. **To highlight potential swing and opportunity booths** where BJP has the highest likelihood of increasing its vote share.
6. **To provide data driven recommendations** for improving BJP's organizational presence, voter outreach, and booth management strategies.
7. **To support long-term planning** by creating a structured analytical foundation for future electoral strategies in Warangal West.

METHODOLOGY

This report is based on a detailed quantitative analysis of polling-station level electoral data from the Warangal West Assembly Constituency. The methodology includes the following steps:

1. **Data Collection**
    - Official polling station results were compiled, including vote counts for all major parties and independent candidates.
    - Additional postal ballot data was incorporated to reflect complete vote totals.
2. **Data Cleaning & Preparation**
    - Column names were standardized for consistency (e.g., renaming candidate columns as BJP, INC, BRS, BSP).
    - Missing values, inconsistencies, and duplicates were checked and resolved.
3. **Booth-Level Statistical Analysis**
    - Vote totals, averages, and share percentages were calculated for each party at every polling station.
    - Comparative metrics were used to evaluate BJP's performance relative to other parties.
4. **Graphical Mapping & Visualization**
    - Piecharts, barcharts, line plots, and distribution graphs were generated to visually interpret vote trends.
    - Special visualizations were created for high-performing and low-performing BJP booths.
5. **Performance Segmentation**
    - Polling stations were segmented based on BJP vote levels:
        - High-performance booths
        - Moderate-performance booths
        - Low-performance booths
    - Opportunity and risk zones were identified through comparative analysis.

Findings & Analysis – Vote Share Percentage



1. INC leads the constituency

- **INC secures the highest vote share at 43.78%**, making it the strongest party.
- This reflects strong organizational presence and voter support.

2. BRS stands second

- **BRS receives 35.72%**, showing it still holds a large base but has lost ground compared to previous years.

3. BJP emerges as a growing contender

- **BJP gets 18.87%**, marking a significant improvement.
- This shows increasing voter acceptance and strong potential for further growth.

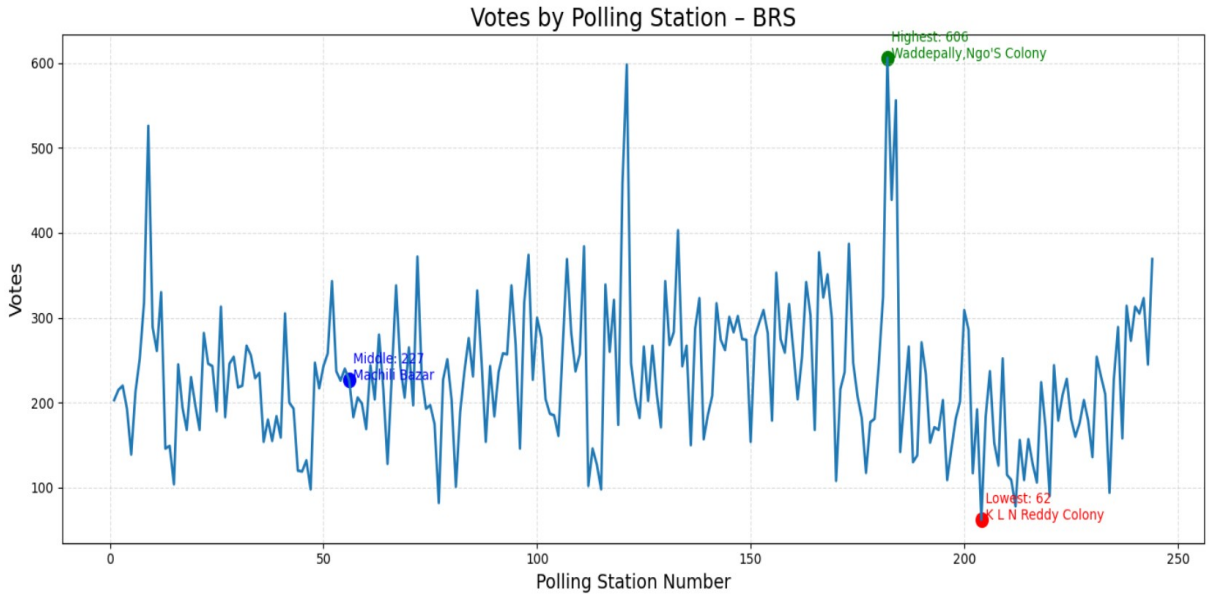
4. Minimal impact from smaller candidates

- NOTA (2.05%) and other candidates each receive **less than 1%**.
- These small segments represent possible areas where BJP can convert undecided or dissatisfied voters.

5. Key takeaway

- The constituency shows a **three-party competition** with INC leading, BRS maintaining a sizable base, and **BJP rapidly emerging as a strong challenger**.
- With focused booth-level strategies, BJP can expand its vote share significantly.

BRS Votes by Polling Station



1. Strongest Booth

- BRS gets its highest votes (**606**) at **Waddepally, NGO's Colony**, showing a major support pocket.

2. Weakest Booth

- The lowest votes (**62**) appear at **K L N Reddy Colony**, indicating very weak support.

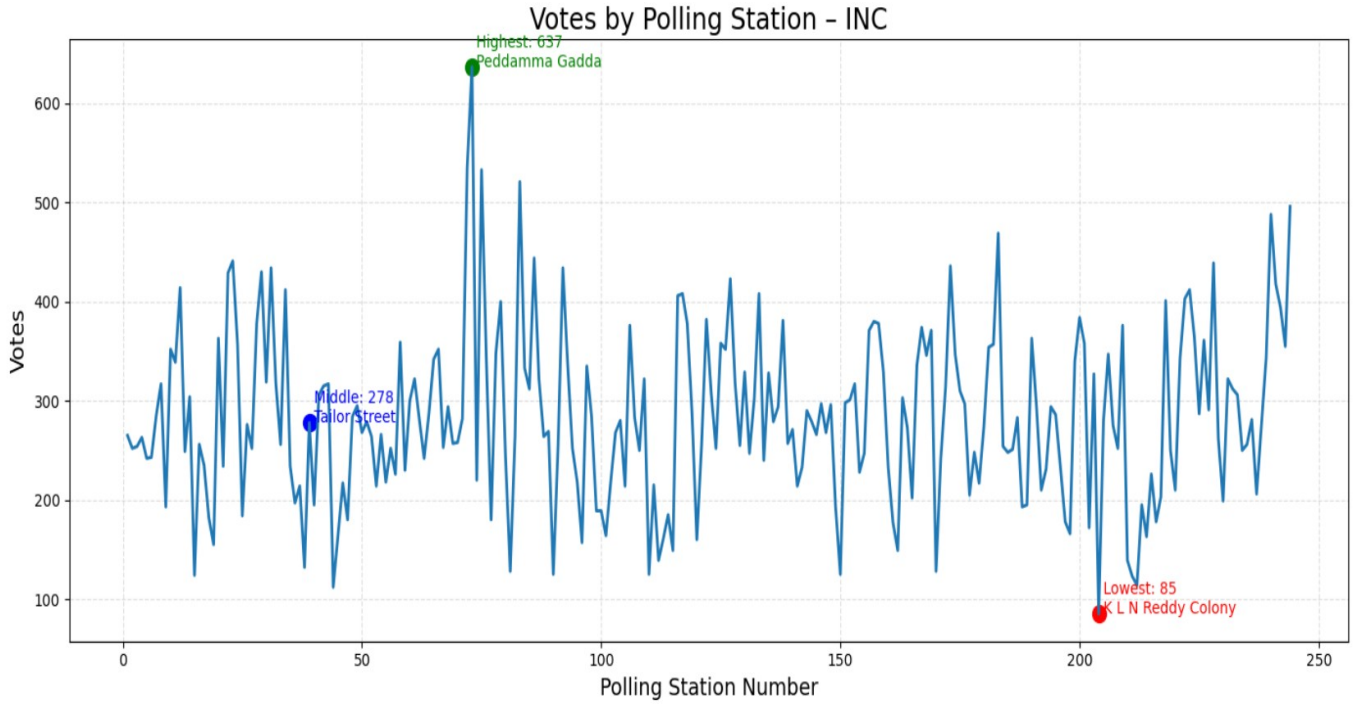
3. Overall Pattern

- Most booths fall between **180–300 votes**, showing moderate but uneven support.
- Large ups and downs across booths suggest inconsistent ground presence.

4. Insight for BJP

- Weak BRS booths are strong opportunity zones for BJP.
- High BRS booths highlight areas where BJP needs targeted campaigning.

INC Votes by Polling Station



1. Strongest Booth

- INC's highest support is **637 votes** at **Peddamma Gadda**, indicating a dominant stronghold.

2. Weakest Booth

- The lowest votes (**85**) occur at **K L N Reddy Colony**, showing minimal INC influence in that area.

3. Overall Pattern

- INC maintains consistently high vote ranges between **250–400 votes** in most polling stations.
- This stability reflects a strong organizational presence across the constituency.

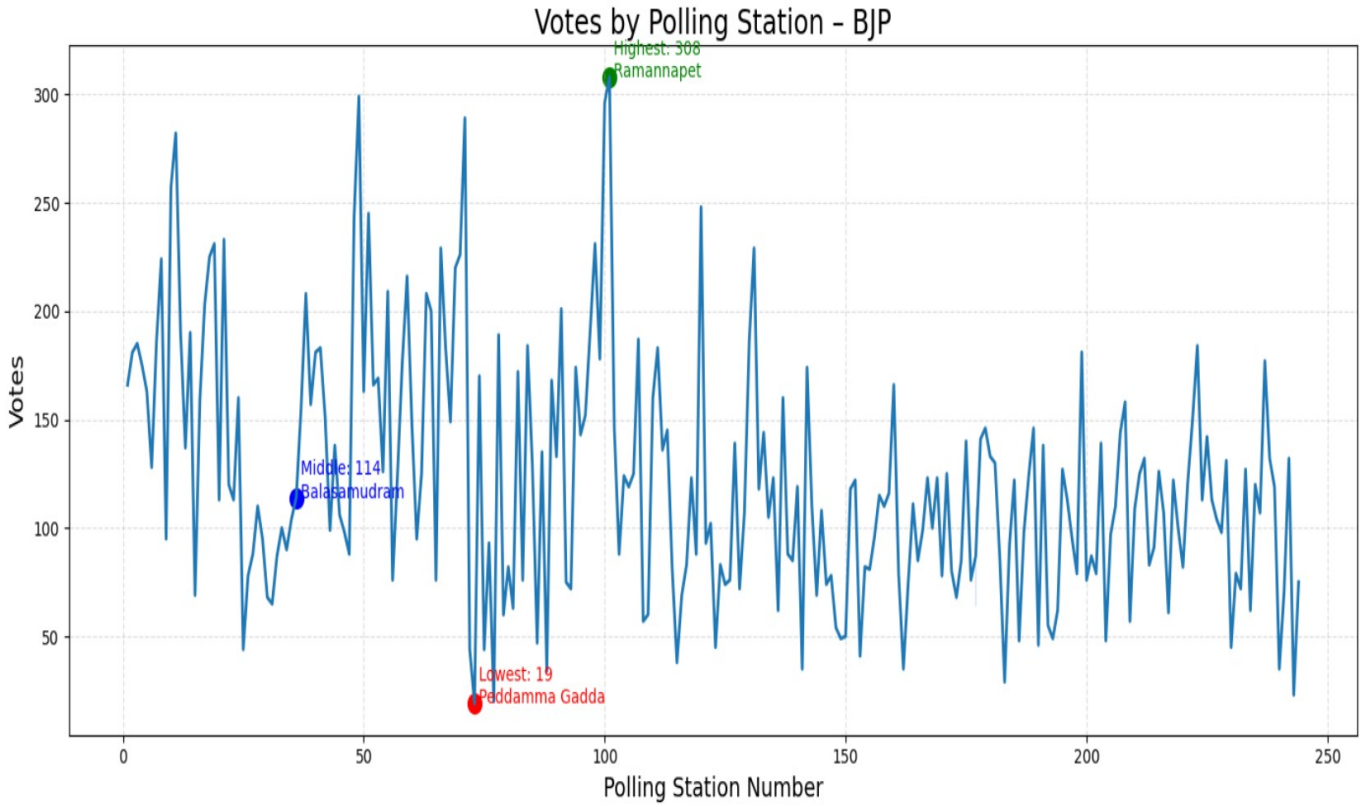
4. Middle-Level Booths

- A typical mid-range booth, **Tailor Street**, shows **278 votes**, indicating above-average support.

5. Insight for BJP

- INC's strong clusters should be prioritized for counter-strategy.
- Low INC booths are key opportunities where BJP can expand influence more effectively.

BJP Votes by Polling Station



1. Strongest Booth

- BJP's highest support is **308 votes** at **Ramannapet**.
- This shows a strong BJP presence and solid voter backing in this area.

2. Weakest Booth

- The lowest support is **19 votes** at **Peddamma Gadda**, indicating almost no BJP penetration.

3. Overall Pattern

- BJP votes fluctuate heavily between **50 and 200 votes** across most booths.
- This reflects inconsistent outreach and uneven influence in the constituency.

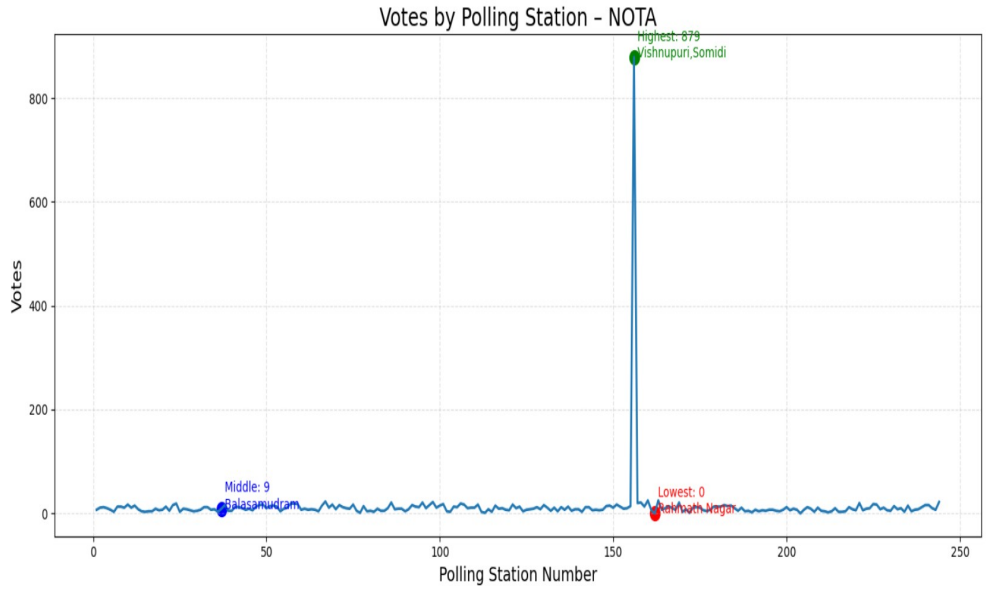
4. Middle-Level Booths

- A typical mid-range booth is **Balasamudram** with **114 votes**, showing moderate support.

5. Insight for Strategy

- BJP must improve micro-level presence in low-scoring booths.
- Strengthening moderate booths (100–150 votes) can significantly raise overall vote share.
- High-performing areas should be maintained as core BJP clusters.

NOTA Votes by Polling Station



1. Extremely High Outlier

- A massive spike of **879 NOTA votes** occurs at **Vishnupuri, Somidi**.
- This is unusually high and suggests **strong voter dissatisfaction**, possible **protest voting**, or **local issues with candidates** in that booth.

2. Lowest NOTA Votes

- Some polling stations recorded **0 NOTA votes**, such as **Kaimath Nagar**, indicating communities where voters strongly preferred choosing a candidate.

3. Overall Pattern

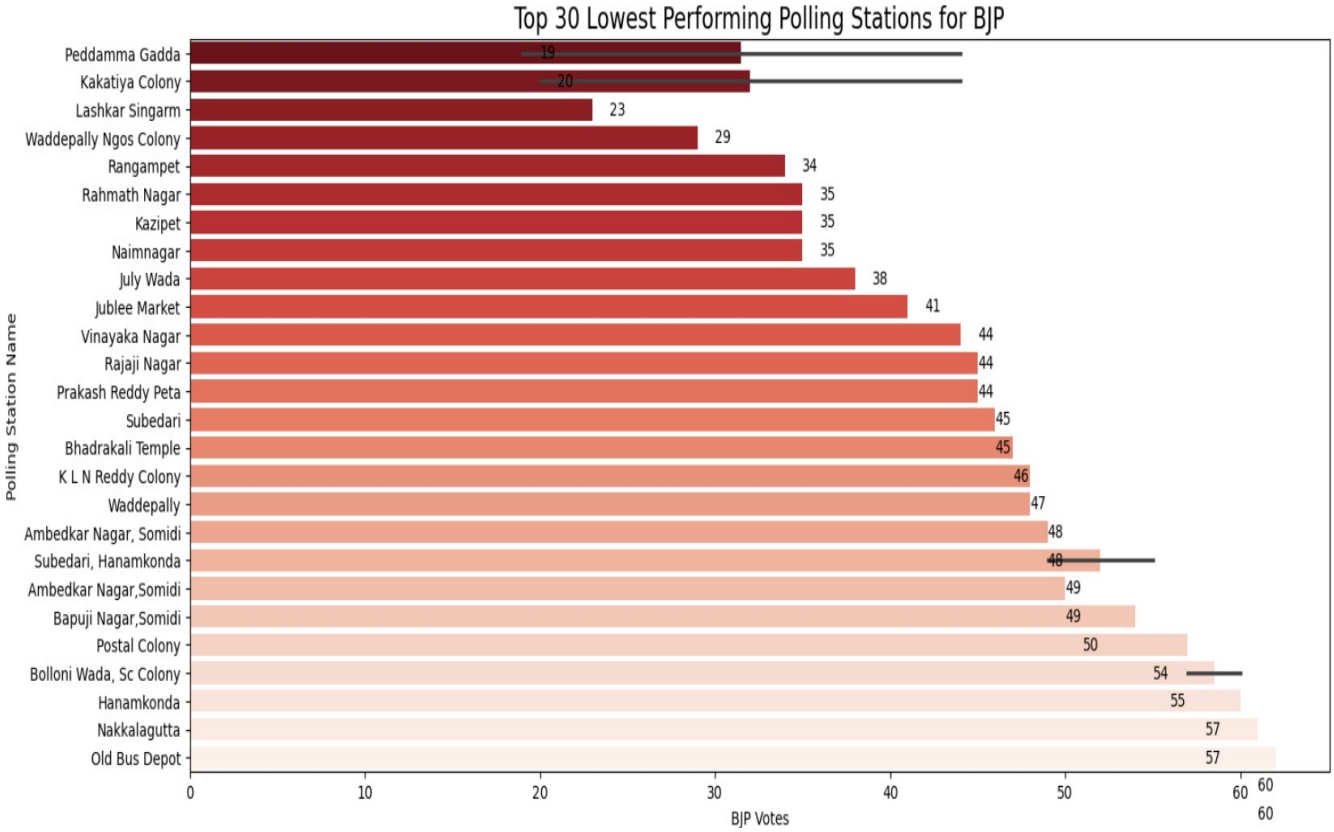
- Across most booths, NOTA remains very low (**5–15 votes** on average).

- This shows that only a few isolated locations expressed significant dissatisfaction.

4. Insight for BJP

- High NOTA booths represent **golden opportunities**:
  - Dissatisfied voters can be shifted toward BJP with micro-level engagement.
  - Focused booth-level outreach and candidate trust-building can convert NOTA votes into BJP votes.

Lowest Performing BJP Polling Stations



1. Extremely Weak Zones

- BJP's weakest booths include:
  - **Peddamma Gadda (19 votes)**
  - **Kakatiya Colony (20 votes)**
  - **Lashkar Singaram (23 votes)**

These areas reflect **critical gaps in BJP visibility, organization, and voter outreach**.

2. Consistent Low Scores

- Many booths fall within the **30–45 vote range**, such as:
  - **Rahmath Nagar**
  - **Naimnagar**
  - **Jubilee Market**
  - **Rajaji Nagar**

This shows a **widespread softness in BJP support** across urban and semi-urban clusters.

3. Moderate Low-Level Booths

- Some booths cross **50–57 votes**, including:
  - **Postal Colony**
  - **Hanamkonda**
  - **Nakkalagutta**
  - **Old Bus Depot**

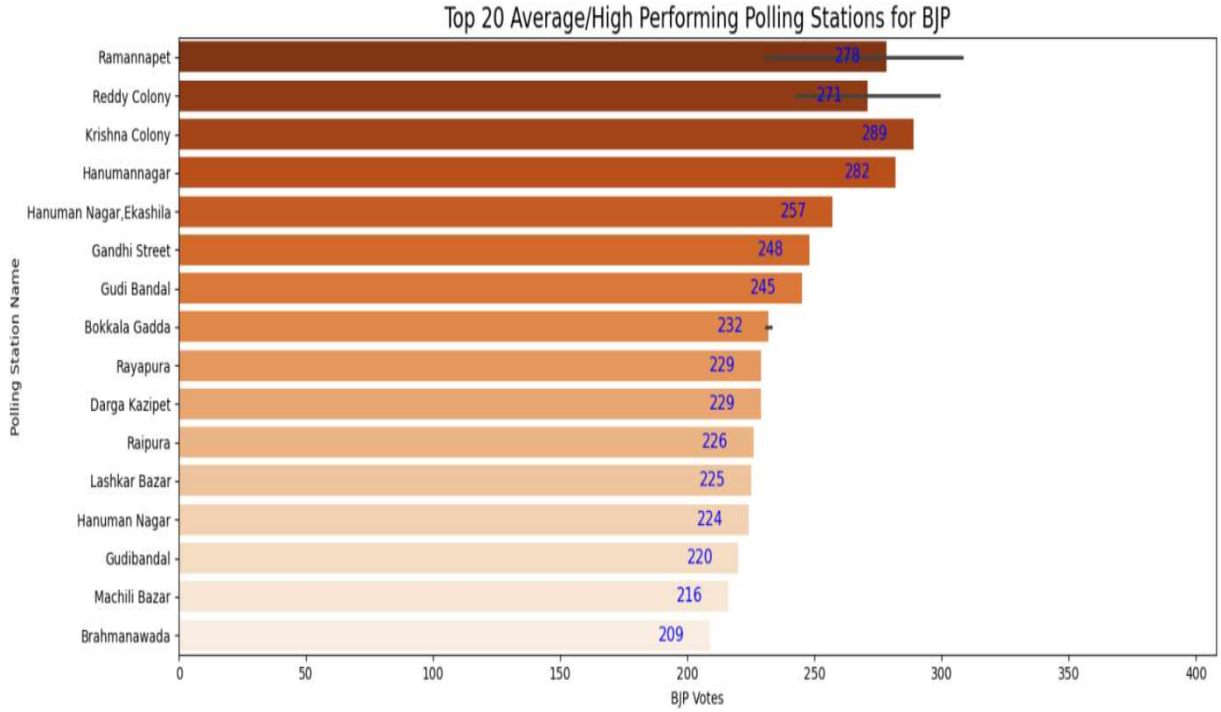
These are **recoverable zones** where smaller campaign pushes can yield higher gains.

4. Strategic Insight for BJP

- These weak booths represent **high-potential growth areas** if addressed with:
  - Targeted booth committees
  - Community connect programs
  - Local candidate visibility
  - Issue-based communication

Improving even **20–30 votes per booth** in these low-performing areas could significantly change BJP's overall vote share.

Top 20 High Performing BJP Polling Stations



1. Strongest BJP Booths

- **Ramannapet (278 votes)**, **Krishna Colony (289 votes)**, and **Reddy Colony (271 votes)** are BJP's top-performing areas.
- These booths show **solid voter backing** and strong BJP presence.

2. Consistent High Support Zones

- Locations like **Hanumannagar**, **Hanuman Nagar–Ekashila**, **Gandhi Street**, and **Gudi Bandal** all scored between **245–282 votes**.
- These reflect **well-established BJP pockets**.

3. Upper-Mid Performing Areas

- Booths such as **Rayapura**, **Lashkar Bazar**, **Machili Bazar**, and **Brahmanawada** scored between **209–232 votes**.
- These are **reliable areas** where small improvements can produce significant gains.

4. Strategic Insight

- These high-performing booths should be treated as:
  - Core vote banks
  - Volunteer recruitment zones
  - Event & rally hubs

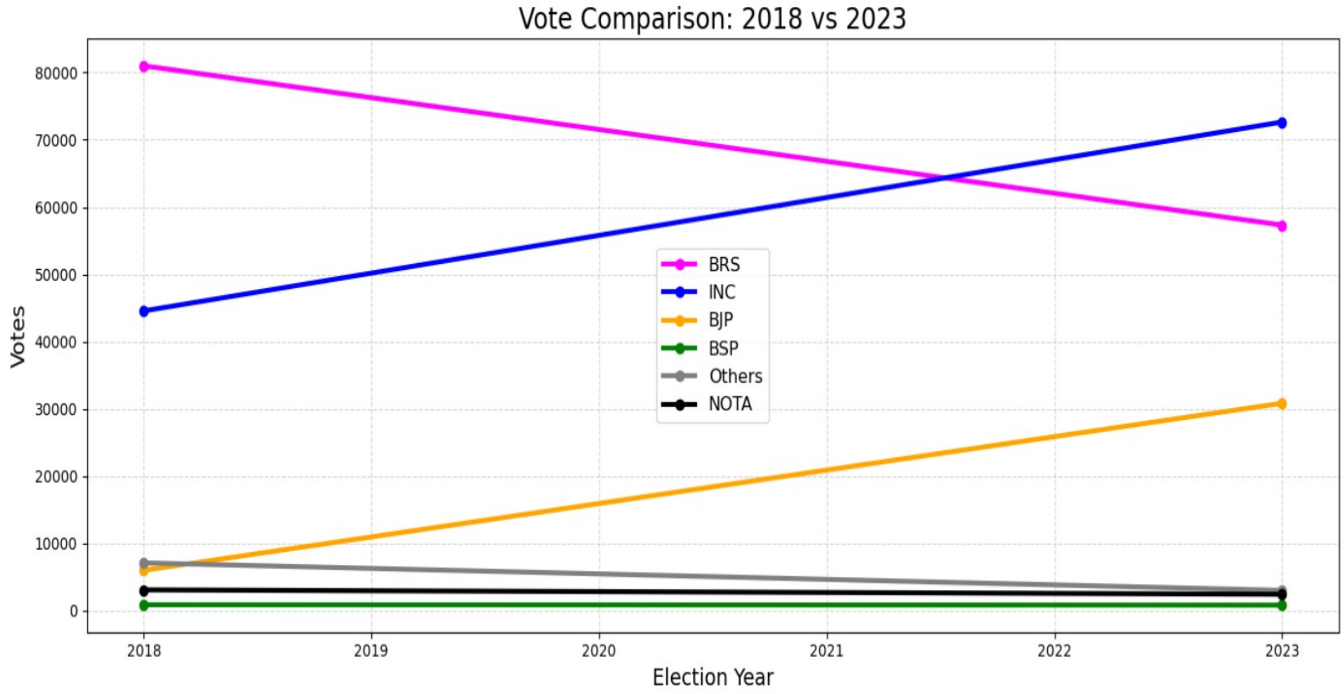
Top 10 Lowest BJP Booths

Rank	Polling Station Name	Votes
1	Peddamma Gadda	19
2	Kakatiya Colony	20
3	Lashkar Singaram	23
4	Waddepally Ngos Colony	29
5	Rangampet	34
6	Rahmath Nagar	35
7	Kazipet	35
8	Naimnagar	35
9	July Wada	38
10	Jubilee Market	41

Top 10 Highest BJP Booths

Rank	Polling Station Name	Votes
1	Krishna Colony	289
2	Hanumannagar	282
3	Ramannapet	278
4	Reddy Colony	271
5	Hanuman Nagar, Ekashila	257
6	Gandhi Street	248
7	Gudi Bandal	245
8	Bokkala Gadda	232
9	Rayapura	229
10	Darga Kazipet	229

Vote Comparison (2018 vs 2023)



INC: Major Growth

- INC increased from **44,555 → 72,649 votes**, a **63% jump**.
- This is the **strongest upward trend**, showing significant consolidation of anti-incumbency.

2. BJP: Fastest Growth Rate

- BJP rose from **5,979 → 30,826 votes**, a **416% increase**.
- This is the **largest growth rate among all parties**, showing rapidly expanding influence, especially in urban and semi-urban booths.

3. BRS: Sharp Decline

- BRS dropped from **81,006 → 57,318 votes**, a **29% decrease**.
- The graph shows a **steady decline**, reflecting loss of voter trust and shifting loyalties.

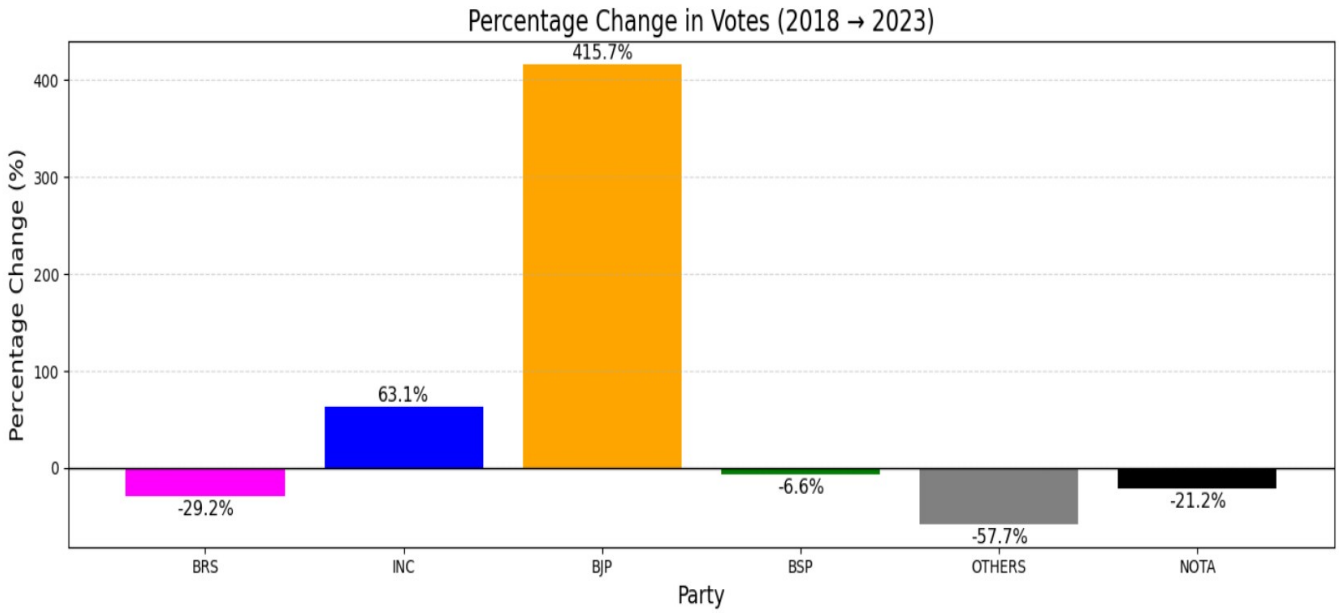
4. Others + BSP: Small but Relevant

- BSP (865 → 808 votes) and Others showed slight declines.
- Their trends indicate **vote consolidation toward major parties**.

5. NOTA Decline

- NOTA fell from **3,075 → 2,426**, meaning fewer protest votes.
- Suggests **more meaningful engagement with candidates**.

Percentage Change (2018 → 2023)



1. BJP – Massive Growth (+415.7%)

- BJP shows an **explosive increase**, rising over **4×** from its 2018 vote share.
- This makes BJP the **fastest-growing party** in Warangal West.
- Indicates rapidly expanding acceptance, especially in urban pockets.

2. INC – Strong Positive Growth (+63.1%)

- INC has gained significantly, benefiting from anti-incumbency.
- This steady growth has positioned INC as the **current leading party** in 2023.

3. BRS – Major Decline (−29.2%)

- BRS saw a sharp drop, losing nearly **one-third** of its votes.
- This reflects **loss of credibility**, voter fatigue, and migration toward INC and BJP.

4. Others – Sharp Drop (−57.7%)

- Votes from independents and small parties collapsed.
- This means voters are **consolidating behind major parties** — mostly INC and BJP.

5. NOTA – Decrease (−21.2%)

- Fewer protest votes in 2023.
- Indicates more voters are picking a candidate rather than rejecting all.

Party / Category	2018 Votes	2023 Votes	Change	% Change
BRS	81,006	57,318	−23,688	**−29.2%**
INC	44,555	72,649	+28,094	**+63.1%**
BJP	5,979	30,826	+24,847	**+415.7%**
BSP	865	808	−57	−6.6%
Others	7,084	2,998	−4,086	−57.7%
NOTA	3,075	2,426	−649	−21.2%

Summary

The 2023 Warangal West election data reveals a significant political shift driven by changing voter sentiment booth-level variations, and the emergence of new competitive dynamics. INC secured the highest vote share, benefiting strongly from anti-incumbency against BRS while BJP demonstrated extraordinary growth, expanding its vote base by more than four times compared to 2018. BRS, once dominant, experienced a sharp decline in both total votes and booth-level performance signaling a substantial loss of ground across the constituency.

Booth-wise analysis shows that BJP has strong pockets of influence in semi-urban and middle-class areas such as Ramannapet, Krishna Colony, and Hanumannagar but continues to underperform in older settlement regions like Peddamma Gadda, Kakatiya Colony, and Lashkar Singaram. INC and BRS maintain consistent performance across most booths, though INC outperforms both in high-population polling stations. NOTA and votes for smaller parties declined significantly, indicating a shift toward consolidation among major political parties.

The comparative trend between 2018 and 2023 confirms a clear transformation:

- **BJP emerges as the fastest-growing party**, with a 415% increase in votes.
- **INC becomes the leading vote-getter**, showing strong positive momentum.
- **BRS faces a major downward slide**, losing nearly 30% of its support.
- **Smaller parties and NOTA shrink**, demonstrating polarized voter preferences.

Overall, the constituency is transitioning into a **competitive bipolar contest between INC and BJP**, with BRS rapidly losing relevance. Booth-level patterns highlight specific areas of weakness and opportunity, offering clear strategic direction for targeted mobilization, resource deployment, and voter engagement. The analysis suggests that with focused intervention in low-performing booths and consolidation of high-performing clusters BJP can significantly strengthen its electoral standing in the next election cycle.

Key Insights

1. BJP is the Fastest-Growing Party

BJP's vote share increased by over **415%** from 2018 to 2023, making it the fastest-growing political force in Warangal West. This indicates rising acceptance, expanding influence, and strong potential for future gains.

2. INC Currently Holds the Strongest Position

With over **72,000 votes**, INC leads the constituency and shows strong performance across most booths, making it the primary competitor to beat in the next election.

3. BRS Has Significantly Declined

A major drop of nearly **24,000 votes** and shrinking presence across booths highlights severe erosion of BRS support. Many former BRS voters have shifted toward INC and BJP.

4. Clear Polarization Toward Two Main Parties

The decline in votes for BSP, independents, and NOTA shows that voters are now consolidating behind **INC and BJP**, turning the constituency into a two-way contest.

5. BJP Has Strong Pockets but Inconsistent Spread

BJP performs very well in:

- Ramannapet
- Krishna Colony
- Hanumannagar
- Reddy Colony

but performs poorly in:

- Peddamma Gadda
- Kakatiya Colony
- Lashkar Singaram

This inconsistency reveals areas where BJP must intensify ground-level presence.

6. Swing Potential Exists in Mid-Level Booths

Booths where BJP scores **40–120 votes** represent high-opportunity zones. Improving these by even **30–40 votes per booth** can dramatically change the overall result.

7. High NOTA Booths Are Opportunity Zones

Polling stations with unusually high NOTA votes show voter dissatisfaction with available candidates. These can be converted into BJP support with the right outreach strategy.

8. Urban and Semi-Urban Areas Favor BJP More

BJP tends to perform better in:

- middle-class
- high-literacy
- organized residential colonies

This demographic insight is crucial for targeted campaigning.

9. Strengthening Booth Committees is Critical

Most low-performing BJP booths indicate weak local organization. Creating strong booth teams could significantly increase vote share.

10. BJP's Path to Victory Is Achievable

With its strong growth trend, increasing visibility, and strategic focus on weak booths, BJP can realistically challenge both INC and BRS in the next election.
